Mr. William McCauley, Director
Bureau of Employees' Compensation
Federal Security Agency
Fourth and Independence Avenue, S. W.
Washington 25, D. C.

Dear Mr. McCauley:

At the present time the Medical Division of this Agency is furnishing only emergency, preventive and diagnostic treatment to our employees. Extensive repairs and alterations to our facilities have just been completed, however, and we wish to increase the scope of our function to include the treatment of employees within the limits of the Compensation Act. This is desirable from the standpoint of operating efficiency and can be accomplished with the present facilities and no increase in personnel complement.

It is, therefore, requested that approval be granted to extend the functions of the Medical Division of this Agency within the scope indicated above. The Chief, Medical Division will be very pleased to confer with the appropriate officials from the Commission in order to reach a definite understanding of his authority and the proper area of his activities.

Very truly yours,
